Achieve Treks

Built a modern travel and trekking website enabling users to explore packages, itineraries, and travel details. Worked on both frontend and backend systems, ensuring fast performance and SEO optimization for better visibility.

<https://www.achievetreks.com/en>

Cuts and Coffee

Created dynamic websites using Next.js, incorporating cutting-edge tools like Three.js and GSAP for seamless animations and captivating effects, enhancing the overall user experience.

<https://cutsandcoffee.com.np>

Biskajatra

Developed a visually engaging website for cultural/event presentation. Focused heavily on SEO, smooth UI interactions, and responsive design for better engagement.

<https://biskajatra.com>

CSSE Australia

Developed a professional Catchmentship Simulation Solution focused on clean UI, content delivery, and performance optimization. Ensured smooth navigation, mobile responsiveness, and scalable architecture.

<https://csse.com.au>

Sincere Travels

Built a production-grade travel booking system integrating Amadeus API for real-time flight data and booking services.

Implemented secure payment gateway integration and handled end-to-end booking workflows.

<https://www.sinceretravels.com>

Pet Haven

Designed and developed a complete pet adoption system where users can browse pets, view details, and manage adoption requests.

Built full backend logic, database design, and frontend UI from scratch.

<https://fyp-pethaven.netlify.app>

Serang School

Created high-performing, dynamic websites using Next.js 12, optimizing for speed and responsiveness.

<https://serangschool.org>

Sweet Science Boxing and Fitness

Crafted a comprehensive dashboard using React.js tailored for finance management, user enrollment tracking in fitness facilities, and various administrative functionalities.

Club Bizarre

Developed a cutting-edge web application centered around cryptocurrency management, leveraging React.js to deliver a sophisticated and intuitive user experience.

Baccpacc

Crafted an extensive dashboard using React.js designed for user administration, trip organization, and assorted administrative capabilities.
